

The CBF Church of England Deposit Fund

Fund fact sheet – 30 September 2024

Investment objective

The fund aims to provide a high level of capital security and a competitive interest rate.

Investment policy

The fund is a diversified portfolio of sterling denominated money-market deposits and other instruments. It will principally invest in call accounts, notice accounts, term deposits, and money-market instruments, but may invest in other assets (including loans to diocesan authorities), which may be either liquid or illiquid in nature. The fund is actively managed, which means the manager uses their discretion to pick investments, in pursuit of the investment objective.

Target investors

The fund is designed for Church of England charities who are looking for a high level of capital security and a competitive interest rate for their short-term investments.

Who can invest?

Any charitable trust with objects connected with the work of the Church of England.

Fund update

The prime focus of the fund is to provide capital security with excellent liquidity and a competitive yield. For that reason, the fund is invested only in cash and near-cash assets, diversified across what we assess as high-quality counterparties.

Short-dated yields in pound sterling (e.g. six months) remain higher than slightly longer-dated yields (e.g. one year). As a result, we have adjusted our preferred investment horizon to the shorter four- to six-month range, rather than the twelve-month period.
