

# COIF Charities Deposit Fund

Fund fact sheet – 31 March 2024

## Investment objective

The fund aims to provide a high level of capital security and a competitive yield.

## Investment policy

The fund is a diversified portfolio of sterling denominated money-market deposits and other instruments. It will principally invest in call accounts, term deposits, and money-market instruments, but may invest in other assets. The fund is actively managed, which means the investment manager uses their discretion to pick investments, in pursuit of the investment objective.

The fund follows a client-driven ethical investment policy.

## Target investors

The fund is designed for charities who are looking for a high level of capital security and a competitive interest rate for their short-term investments.

## Who can invest?

Any charitable organisation, as defined in the Charities Act 2011, can invest in the fund, provided that its powers permit.

## Fund update

The prime focus of the investment strategy is to provide capital security with excellent liquidity and a competitive yield. The portfolio is invested only in cash and near cash assets diversified across a number of approved, high-quality counterparties.

In the expectation that rates have peaked and any forthcoming change in the OBR will be downwards, the Fund is positioned to take advantage of the higher rates currently available for slightly longer term lending. This should provide some degree of protection for the Fund's yield from the immediate effect of any reduction in the Bank of England's policy rate.
