

Key Investor Information

The Public Sector Deposit Fund

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

The Public Sector Deposit Fund (the fund) Income Share Class 4 ISIN: GB00B3LDFH01
A sub-fund of CCLA Public Sector Investment Fund (the company).
An open-ended investment company (OEIC) that is managed by CCLA Investment Management Limited, the authorised corporate director (the ACD or CCLA).

Objectives and Investment Policy

The investment objective of the fund is to maximise the current income consistent with the preservation of principal and liquidity by investing in a diversified portfolio of high-quality sterling denominated deposits and instruments. The primary objective is to maintain the net asset value (NAV) per share of the fund at par (net of earnings).

The investment policy of the fund is to only invest in sterling denominated investments and deposits. The principal investments will comprise certificates of deposit, call accounts, and term deposits with banks and building societies. The fund may also invest in other securities such as commercial paper, floating rate notes and bonds which may be issued or guaranteed as to principal or interest by sovereign governments and their agencies, supranational entities, corporations and financial institutions. All investments at the time of purchase will be considered by the ACD to be of high quality, meaning that the ACD has performed its own documented assessment of the credit quality of money market instruments taking into account ratings awarded by a credit rating agency registered and supervised by the Financial Conduct Authority (FCA) or European Securities and Markets Authority.

The fund is a low volatility net asset value short-term money market fund under the UK Money Market Funds Regulation

(MMFR). The weighted average maturity of the fund's investments will not exceed 60 days and the initial or remaining maturity of each investment will not exceed 397 days at the time of purchase.

The weighted average life of the fund's investments will not exceed 120 days.

Investment style: The fund is actively managed which means the ACD, as investment manager, uses their discretion to pick investments to seek to achieve the fund's investment objective.

Comparator benchmark: For comparison purposes only, the fund measures its performance against the Sterling Overnight Index Average (SONIA).

Target market: The fund is marketable to professional and retail investors but is principally targeted at public sector investors. The fund is suitable for investors who are looking for security, liquidity and yield in that order.

The shares that you will hold in the fund are income shares. This means income from the fund's investments will be paid out to you as a dividend on a monthly basis.

You can buy or sell shares daily (on each business day of the fund). Instructions (and for purchases, cleared funds) must be received by the registrar before 11.30 am London time on the relevant dealing day.

Risk and Reward Profile

The risk and reward rating is based on historical data and may not be a reliable indicator of future risks or rewards. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean 'risk free'.

A low-risk fund is not a risk-free investment. Low-risk funds target investments with low volatility and aim to maintain a constant net asset value at par. This means the risk of losing your money is small, but the chance of making gains is also limited. **Shareholders and potential shareholders should note that, in certain circumstances, the fund will not accept redemptions or subscriptions at a constant NAV per share.**

The ACD applies a liquidity management process for ensuring compliance with weekly liquidity thresholds applicable to the fund under the MMFR. Measures and various tools are at the ACD's disposal for maintaining compliance with the prescribed limits and include the imposition of liquidity fees on redemptions, redemption gates and temporary suspension of redemptions.

The risk and reward rating does not cover the following additional risks:

- **The value of the fund's shares is not guaranteed, and buying shares is not the same as making a deposit with a bank or other deposit taking body. Please see the additional information section below.**
- Investment is at your own risk. The fund has no capital guarantees and the value of your investment may go up or

down. Any loss of principal is to be borne by the investor.

- The fund aims to maintain a stable NAV per share, however there is no guarantee that a stable NAV per share will be maintained.
- The fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per share.
- The value of the fund may be affected by movements in interest rates (which may include interest rates turning negative) and the creditworthiness of the issuers of the debt instruments the fund invests in.
- **Counterparty risk** - The fund could lose money if an entity with which it does business becomes unwilling or is unable to meet its obligations to the fund.
- **Operational risk** - Operational risks arising from errors in processing transactions, preparing valuations, accounting and financial reporting, among other things, may also affect the value of your investments.
- **Credit risk** - The fund is exposed to the issuers of the securities it invests in. If these financial institutions experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.

Please refer to the prospectus for full details about the risks associated with this fund.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The **ongoing charges** figure is based on the annual management charge. The annual management charge is currently 0.08% per annum (having been reduced from 0.10% per annum until further notice) and is inclusive of all other ongoing charges. This figure may vary from year to year. It excludes portfolio transaction costs.

Although unlikely (reflecting the liquid nature of qualifying investments to be held), a dilution levy, which will change the prices for buying or selling shares in the fund with the aim of mitigating the effects of dealing and other charges the fund incurs, may be made on a purchase or sale of shares in the fund.

For more information about charges, please see the section titled "Charges and Expenses" of the company's prospectus, which is available at www.ccla.co.uk.
